

EMMANUEL TOBALASE

Frontend / Full-Stack Developer — React & Node.js

Lagos, Nigeria · Email: emmanueltobalase@gmail.com · 08122958042

GitHub: github.com/Manuel-Lab-Code · LinkedIn: linkedin.com/in/Manuel216

SUMMARY

Frontend developer focused on React and Node.js, building fast, accessible, production ready web applications from multi tenant SaaS platforms with proper authentication and data isolation, to conversion focused client sites. Based in Lagos, Nigeria; available for remote and onsite work.

SKILLS

Frontend: React, TypeScript, JavaScript, Redux, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, REST APIs, JWT Authentication

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Tools & Platforms: Git/GitHub, Vite, Figma, Postman, Vercel, Netlify, Render

Animation & UI: Framer Motion, GSAP

EXPERIENCE

Full Stack Developer (Freelance) — iMadious School Systems

Remote · Lagos, Nigeria

- Designing and building a multi tenant school management platform from the ground up, including architecture, auth, and admin tooling for multiple institutions on shared infrastructure.
- Shipped a production JWT based authentication system with per school data isolation.
- Built a developer control panel for provisioning new schools onto the platform.
- Deployed and maintained a live Node.js / Express / MongoDB backend.

Frontend Developer (Freelance) — Independent Clients

Lagos, Nigeria

- Delivered marketing sites, ecommerce storefronts, and academic portals for local businesses and schools, taking each from design to deployment.
- Built and shipped a React ecommerce storefront deployed on Vercel.
- Delivered a food delivery brand site for a Lagos based business.
- Built a student academic results portal used by real students.

Self Taught Developer — JavaScript & Web Fundamentals

Lagos, Nigeria

- Built a suite of interactive utilities (to-do app, stopwatch, number-guessing game) to establish core JavaScript and DOM fundamentals.
- Developed a public safety registration form for a real community initiative.
- Established a daily coding practice that led into React and full stack development.

SELECTED PROJECTS

iMadious School Management System — Multi tenant SaaS backend for schools with role based JWT auth
(Node.js, Express, MongoDB, JWT)

Academic Results Portal — Student grade and progress-tracking platform (*HTML5, CSS3, JavaScript*)

New Ecommerce — React storefront deployed to production on Vercel (*React, JavaScript*)
